direct light

adjustable light

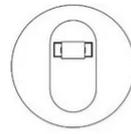

Metrica wall light can be used as a bed-head light to illuminate one's reading or simply relaxing at night with a diffuse and soft light. It is characterised by a shiny body with a length of 15 cm that seems to emerge from the wall in an elegant and essential manner. The LED light source has a 9.5 cm long extension hidden inside the support that forms the base, it lights up the moment it is pulled out, gradually increasing in light intensity until it reaches its maximum position. The circular base rotates 360°, directing the light according to personal needs.
