MULTIDOT

Ispirandosi ai chandelier del passato, Multidot propone una interpretazione moderna del candelabro, sia da un punto di vista compositivo/espressivo che tecnologico, consentendo al progettista la massima personalizzazione e libertà creativa. I cavi elettrici a basso voltaggio 24V a cui vengono agganciate le sfere luminose a LED, sono stati specificatamente progettati per diventare l'elemento strutturale e decorativo della lampada. Multidot è componibile, estremamente flessibile e configurabile: in ogni composizione può variare la lunghezza, il numero e il posizionamento dei cavi elettrici, oltre che il numero delle sfere luminose. In aggiunta alla cura per l'aspetto scenico c'è stata un'attenta progettazione del dettaglio passando dal macro al micro, ogni sfera luminosa LED è stata impreziosita da una finitura superficiale: una serie di micro pallini lucidi è stata distribuita su un fondo opaco attraverso la successione di Fibonacci, generando un piacevole effetto di pieni e vuoti.

Inspired by the chandeliers of the past, Multidot offers a modern interpretation of the candelabra, both from a compositional/expressive and technological point of view, allowing the designer maximum customisation and creative freedom. The LED light spheres are attached to the low-voltage 24V electric cables which are specifically designed to become the structural and decorative element of the lamp. Multidot is modular, extremely flexible and configurable: the length, number and positioning of the electrical cables, as well as the number of light spheres, can vary in each composition. In addition to the attention for the scenic and aesthetic aspect, there has been a careful design of the detail, going from the macro to the micro. Each LED light sphere has been enriched with a surface finish: a series of shiny micro dots has been distributed on the matte background through the Fibonacci succession, generating a pleasant effect of solids and voids.

BRIAN SIRONI

EXAMPLES | SERIE XS | cable 2,1m | 8 spheres each cable

EXAMPLES | SERIE S | cable 2,8m | 12 spheres each cable

EXAMPLES | SERIE M | cable 3,8m | 16 spheres each cable

MULTIDOT

BRIAN SIRONI

Lampada a sospensione a luce diffusa componibile in diverse combinazioni. Formata da un numero variabile di cavi elettrici a 24V studiati appositamente, disponibili in 5 lunghezze: serie XS composta da cavi di 2,1 m con 8 sfere a LED, serie S composta da cavi di 2,8 m con 12 sfere a LED, serie M composta da cavi di 3,8 m con 16 sfere a LED, serie L composta da cavi di 4,5 m con 24 sfere a LED, serie XL composta da cavi di 5,5 m con 32 sfere a LED. I cavi sono completi di contrappeso cilindrico di colore nero, di cavo in acciaio e supporto bloccafune per il fissaggio al soffitto secondo la configurazione. Le sfere opaline sono complete di sorgente di luce a LED da 0,8W.

Disponibili 6 rosoni a soffitto cablati con alimentatore elettronico per le composizioni con 1-2, 4, 8, 12, 18 o 24 cavi.

Disponibile anche un rosone per composizioni lineari da 8 catenarie.

Modular pendant lamp with diffused light that can be configured in different combinations. Consisting of a variable number of specially designed 24V electric cables, available in 5 lengths: XS series consisting of 2.1 m cables with 8 LED spheres, S series consisting of 2.8 m cables with 12 LED spheres, M series consisting of 3.8 m cables with 16 LED spheres, L series consisting of 4.5 m cables with 24 LED spheres, XL series consisting of 5.5 m cables with 32 LED spheres. The cables are equipped with a black cylindrical counterweight, a steel cable and a cable clamp bracket for fixing them to the ceiling. The opal spheres with 0.8W LED light source. Available 6 ceiling rosettes wired with electronic ballast for compositions with 1-2, 4, 8, 12, 18 or 24 cables. Also available is a ceiling rose for linear compositions with 8 catenaries.
