

martinelli luce

PROJECTS

Martinelli Luce, nata come azienda familiare, negli anni ha saputo emergere nel mondo del design, tanto da guadagnarsi la fiducia e l'apprezzamento degli addetti al settore e del pubblico, consolidando il suo marchio sia in Italia che all'Estero. Martinelli Luce non ha mai seguito le mode, ma le ha guardate con un occhio sapiente, proseguendo il proprio percorso incentrato sulla tecnologia, funzionalità e minimalismo, con richiami alla geometria delle forme e alla natura. Molte delle lampade rimandano infatti a elementi naturali e a nomi di fiori, di piante, di animali: Serpente, Pipistrello, Cobra, Colibrì, Cicala, Maggiolone, Pulce... Le forme, già concise e iconiche fin dagli inizi dell'Azienda, l'utilizzo di nuovi materiali, nuovi sistemi di stampaggio, nuove sorgenti di luce e nuove tecnologie hanno sempre scandito la filosofia di Martinelli Luce: ovvero creare non solo nuove forme, ma concentrare l'attenzione a risolvere e a proporre innovative soluzioni di illuminazione.

Fondata da Elio Martinelli negli anni '50 nello scantinato di un palazzo storico situato nel centro di Lucca, l'azienda si è poi spostata negli anni '70 nella attuale sede collocata nel verde rigoglioso che circonda la città. Oggi Martinelli Luce, con la figlia Emiliana e il nipote Marco, continua a produrre nuove soluzioni progettuali con lampade studiate sia internamente, sia da designer esterni.

La storia di Martinelli Luce rappresenta un valore aggiunto importante che è stato difficile da ottenere e che non deve andare disperso; deriva dal lavoro di un insieme di persone che hanno contribuito all'affermarsi dell'azienda.

Per questo motivo diverse lampade storiche sono tuttora in catalogo, insieme ai progetti di nuovi designer che hanno ottenuto importanti riconoscimenti internazionali, tra cui il Compasso d'Oro.

Martinelli Luce ha sempre curato e che continua anche oggi a seguire un lavoro be-spoke che, customizzando lampade di serie o realizzando apparecchi specifici che seguono le richieste progettuali degli architetti per i vari contesti architettonici e il contract.

Martinelli Luce, a company established as a family business, over the years has been able to stand out in the world of design, to the point of gaining the trust and appreciation of both the industry and the public, consolidating its brand both in Italy and abroad. Martinelli Luce has never followed trends, but has looked at them with a wise eye, pursuing its own path centred on technology, functionality, minimalism, with references to the geometry of shapes and nature. Many of the lamps refer to natural elements and the names of flowers, plants and animals: Serpente, Pipistrello, Cobra, Colibrì, Cicala, Maggiolone, Pulce... The shapes, already pure and iconic since the beginning of the Company, the use of new materials, new moulding systems, new light sources and new technologies have always marked Martinelli Luce's philosophy: that is, to create not only new shapes, but to focus on solving and proposing innovative lighting solutions.

Founded by Elio Martinelli in the 1950s in the basement of a historic building in the centre of Lucca, the company moved in the 1970s to its current location in the luxuriant greenery surrounding the city. Today Martinelli Luce, LED by his daughter Emiliana and grandson Marco, continues to produce new design solutions with lamps created both in-house and by external designers.

The history of Martinelli Luce represents an important added value that has been difficult to achieve and must not be dispersed; it derives from the work of a group of people who have contributed to the company's success.

Several historic lamps are still in the catalogue, together with projects by new designers who have won important international awards including the Compasso d'Oro.

Martinelli Luce has always focused on and continues to pursue bespoke work, customising standard lamps or creating specific fixtures that meet architects' design requirements for various architectural contexts and contract projects.
